

In the top right corner, select the user settings icon. As you can see there is information about the last time the user logged in as well.

Welcome, Shaun 🔕

Last Log In: Apr 11 2018 12:44:06

## Now, select the down arrow to expand the language list.

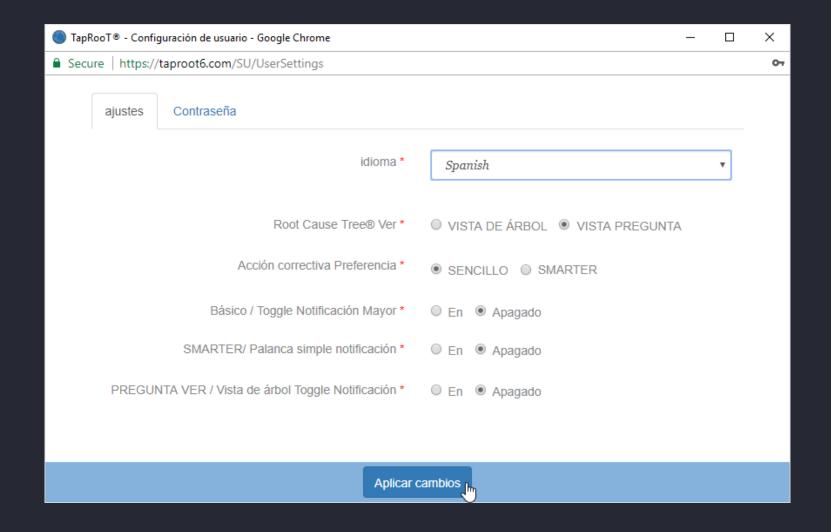

On this menu, the user can choose from over 103 different languages. For this example the Spanish language will be chosen.

Shona Sindhi Sinhala Slovak Slovenian Somali Spanish Sundanese Swahili

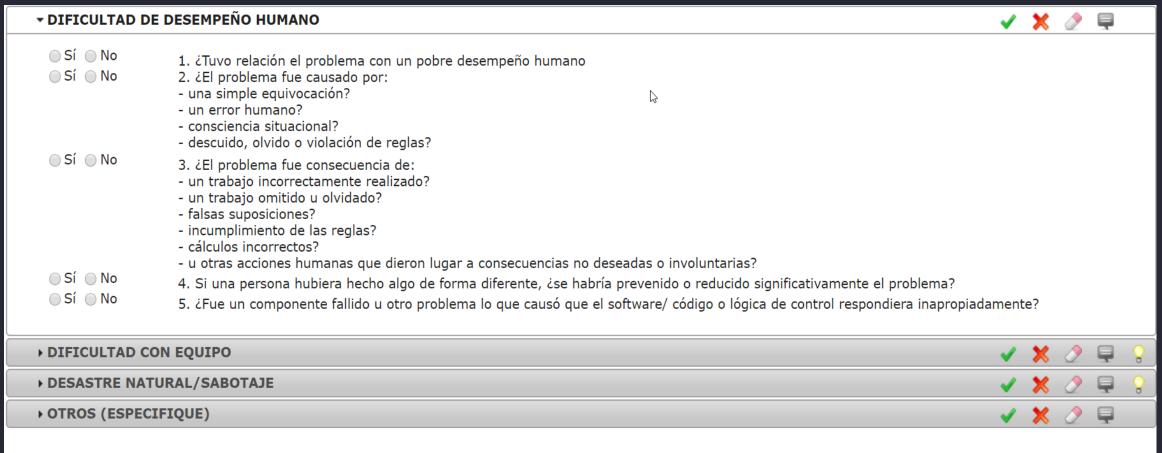

Swedish

## Once the language has been selected, select [Apply Changes]

## Now, all of the text in the TapRooT® application has been translated to the Spanish language. The picture below is of a Root Cause Tree.
